

## Dear diary,

---

today was the second day in Adana. We met at school at 8.30 am, where two busses were waiting for us. We went to the governor of Adana by bus. From each country the teachers and one student were allowed to visit him. From our team Laura went to visit the governor together with Mrs Koch and Mrs Ekici. All the others had to wait on the bus until they returned. Unfortunately it was raining on Tuesday therefore we could not go boating on the lake Catalan. Instead of a boat trip we travelled around the sea by bus which took about 2 hours. After that we visited the drinking water treatment plant of Adana. One man explained to us what they were doing there and showed us the building. At about 12.00 pm we had lunch in the cafeteria of the drinking water treatment plant. After lunch there was some time left and everybody took pictures with the lake in the background. As everybody was ready we went on the bus and travelled around the huge area, which belongs to the drinking water treatment plant to see the other buildings. There was still some time left so we went all together to a big shopping centre in the city centre of Adana. Before the pupils who had not changed money yet had the opportunity to change it. In the shopping centre we had about 1 and ½ hours until we went back to school. When we had arrived at school we went home with our partners. In

Tuesday, the 25<sup>th</sup> February

the evening nearly all met again at a cafe where they celebrated the birthday of one Belgian girl. All in all we had a nice day and enjoyed it although the weather wasn't so good.

Tania
