

# Waterways in Europe: Opportunity or danger?

---

## Evaluation questionnaire - Work in groups

*Please answer to this questionnaire after a consensus in your group, that should be composed with people from, at least, three different nationalities. Try to be critical and constructive: our goal is to improve this project.*

*Only one questionnaire per group should be filled.*

---

1. Has communication through *eTwinning* been fluent? If not, how should it be improved?

Some of them did communicate. Around 50%-60% prefer Facebook or other social networks to communicate.

They should be more active on Twinspace: look at the material, comment on the work of others... It's the task of the teachers to promote that. At least once a week they should take a look, write a comment or vote on the work of others.

g  
nment of tasks during the project affordable?

The assignments were not that heavy. They were interesting.

On the negative side, during the week the groups were too large to work easily week. The students of the country where the meeting is held should be divided in groups each day, so that the work groups are not so large and there are not too many students per activity.

As for the presentations, we teachers should stress for the students the fact that presentations must not be read, they must paraphrase and prepare more.

c  
tivities help you to have an adequate relationship with members of other teams?

English skills been improved? If yes, how?

in  
next meeting. What do you want to do?

Do  
you feel speaking to an audience? What is a positive or negative experience?

( traditions, uses, clothes, food, etc.) did surprised you about Spain?

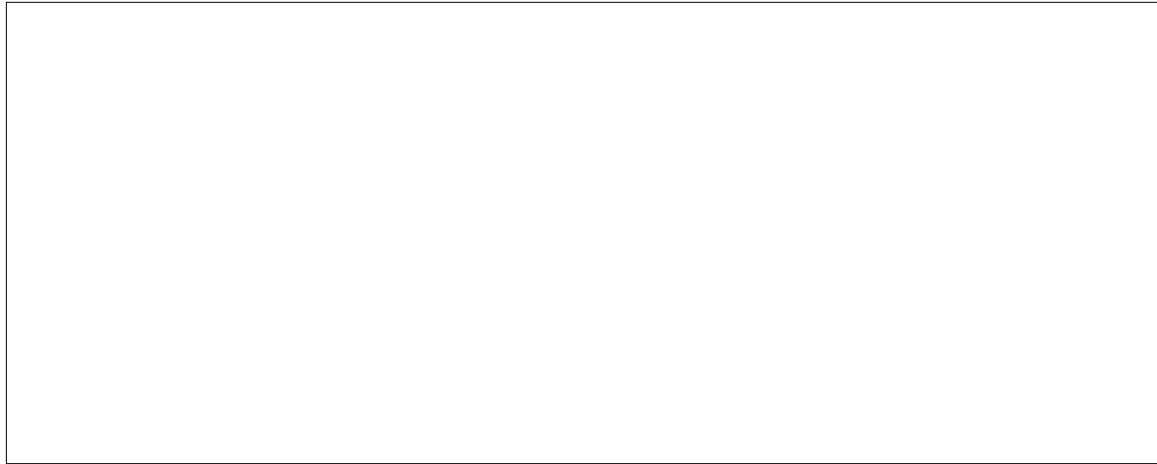

Belgium remarks that the English of the current Spanish groups is better that before. The punctuality is also a positive point. (Belgium has known other groups of Spanish students; this year we stressed English as a selection issue in order to being involved in the Comenius program).

Other comments: in general, Spanish students are outgoing and openminded. It's also positively considered the involvement of other teachers in the activities of the Comenius week. The Spanish colleagues are considered to be friendly.

The preparations are also positively considered.

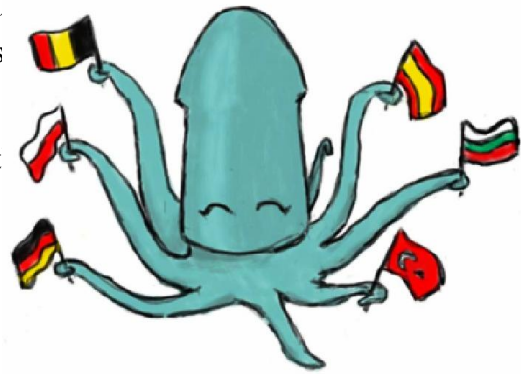

g  
s made you connect with people from the other countries (music, food, etc.)?

o  
u learned about the other participant countries? What have you learned?

0  
ns, ideas. Feel free to add here whatever you want related with the project or the meeting.

- It would be nice having a pin or a t-shirt with the logo of the program (a pin is considered to be easier and cheaper to make)
- There should be more cultural preparations
- We should decide what to put on the web.
- The activities need more time to be perfect

**Thank  
you  
for  
your  
work**
